

DURASTRIPE®

a quality product from
ERGOMAT

DURA VIEW

The flexible system for producing your own durable peel and stick signage. Use your printer, or even just a magic marker and a piece of paper to make your own instant DuraStripe signs with new DuraView from Ergomat!

DuraView's vivid, attention grabbing 2.5" yellow border surrounds a clear window that is sized to accommodate both US Letter and A4 sized paper inserts. Using DuraView is as simple as print, insert, peel, stick, done! Perfect for temporary or permanent floor signs, safety warnings, lean instructions, bar codes or any other information you would use a DuraStripe sign to convey, it makes good sense to keep several DuraView windows on hand for immediate response when the situation arises.
