

  **V series**

La gamme V est conçue pour les installations de pompage et surpression. Ces vases réduisent le nombre de démarrages de la pompe et allongent sa durée de vie.

Vases à vessie interchangeable à usage alimentaire.

Verticaux et horizontaux

Conçus pour la distribution d'eau potable ils sont conformes à la norme 97/23/CE

La vessie de qualité alimentaire isole l'eau de toute partie métallique

The V series is the tank for the classic setups; such as pump and booster settings, potable water, irrigation and sprinkler assembling.

The proper using of the tank save the power of the pump.

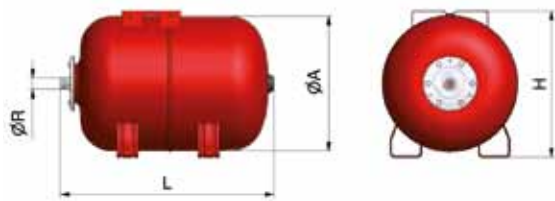

The replaceable membrane fixed between the upper side and the flange avoids scratches and assures the maximum long lasting life.

The vertical and horizontal range can offer galvanized or stainless steel flanges in according with the normative 97/23/EC.

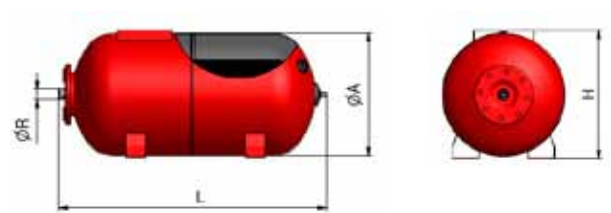

## VASES HORIZONTALS AVEC PLATINE SUPPORT DE POMPE HORIZONTAL VESSELS WITH BRACKET FOR PUMPS
